

Discrete Mathematics

Volume 306, Issue 7, 28 April 2006

Contents

Contributions

- M. Kouider and M. Zaker*
Bounds for the b-chromatic number of some families of graphs 617

- P. Śniady*
Asymptotics of characters of symmetric groups, genus expansion and free probability 624

Notes

- T. Böhme, M. Knor and L. Niepel*
Linkability in iterated line graphs 666

- K. Diao, G. Liu, D. Rautenbach and P. Zhao*
A note on the least number of edges of 3-uniform hypergraphs with upper chromatic number 2 670

- H.A. Kierstead*
Weak acyclic coloring and asymmetric coloring games 673

- I. Leader and K. Markström*
Uncountable families of vertex-transitive graphs of finite degree 678

- M. Lemos*
Matroids with few non-common bases 680

- H. Matsuda*
Fan-type results for the existence of $[a, b]$ -factors 688

- Ø.J. Rødseth*
Enumeration of M-partitions 694

- K. Salem, S. Klavžar and I. Gutman*
On the role of hypercubes in the resonance graphs of benzenoid graphs 699

- Z. Zhang and J. Meng*
Semi-hyper-connected edge transitive graphs 705
